The Royal Institution

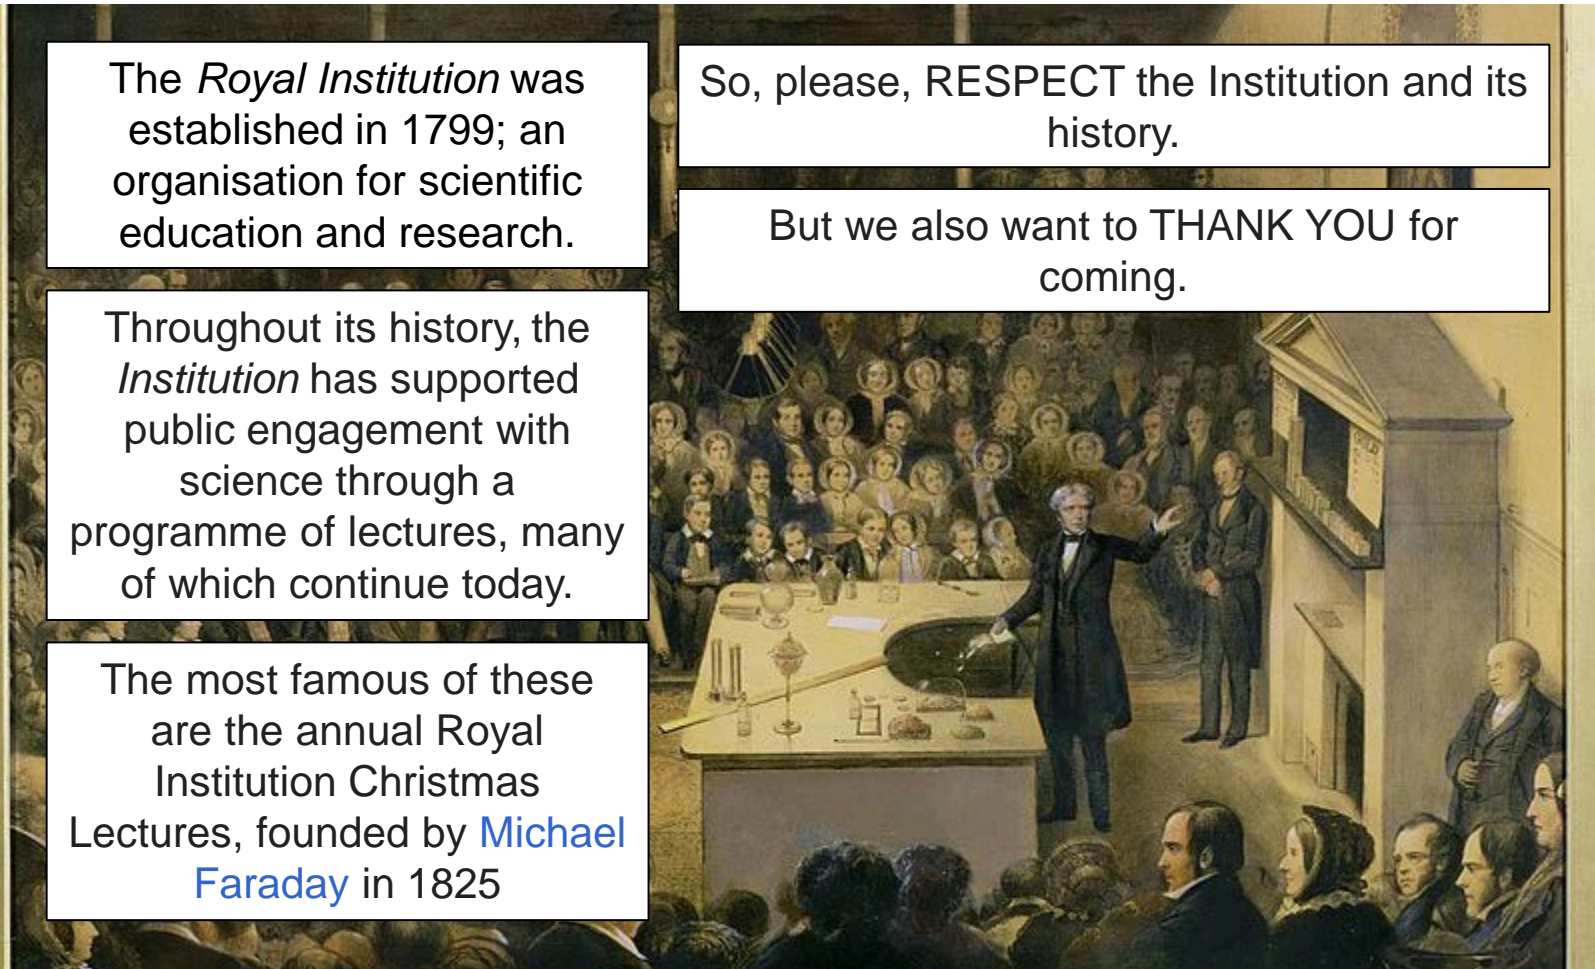

The *Royal Institution* was established in 1799; an organisation for scientific education and research.

Throughout its history, the *Institution* has supported public engagement with science through a programme of lectures, many of which continue today.

The most famous of these are the annual Royal Institution Christmas Lectures, founded by [Michael Faraday](#) in 1825

So, please, RESPECT the Institution and its history.

But we also want to THANK YOU for coming.

See you there...
